Contents

Papers

- 1 Role of niobium in a dual-phase steel** J. R. C. Guimarães, K. K. Chawla, P. R. Rios, and J. M. Rigsbee
- 6 Mechanical properties and microstructure of low-carbon-4% manganese steels** R. L. Reuben and T. N. Baker
- 14 Examination of surface defects induced during hot rolling of high-alloy steel bar and rod** K. Barlow, P. R. Lancaster, and R. T. Maddison
- 20 Plane-strain coining** J. M. Monaghan and A. A. Torrance
- 29 Extrusion of lead at low compressive pressures** F. Weinberg
- 34 Formation of non-metallic protective layers on high-speed steel tools** Z. Pálmai
- 41 Modification of Al-Si alloy melts containing graphite particle dispersions** B. P. Krishnan and P. K. Rohatgi
- 45 Quantitative assessment of strengthening parameters in ferrite-pearlite steels from microstructural measurements** B. E. O'Donnelly, R. L. Reuben, and T. N. Baker
- 52 Influence of cooling rate from normalizing temperature and tempering on strength of ferrite-pearlite steels** B. Mintz
- 61 Creep-rupture properties and microstructure of AISI type 316L submerged-arc weld metals** R. G. Thomas, R. D. Nicholson, and R. A. Farrar
- 66 Influence of interdiffusion with substrate on spreading of molten Au-18Ni braze alloy** A. D. Brooker, J. E. Castle, J. M. Cohen, and M. B. Waldron
- 71 Stirring forces produced by alternating electromagnetic fields in molten metals under axisymmetric conditions** J. A. Shercliff
- 81 Wear characteristics of castings used in internal-combustion engines** T. S. Eyre
- 91 Formability of soft-magnetic Ni-Fe alloy sheet** Y. C. Yoo and D. N. Lee
- 99 Simultaneous spray deposition and peening of metals (SSP)** A. R. E. Singer
- 105 Processing of phosphorus-alloyed low-carbon steel sheet by continuous annealing** A. Thuvander, A. Melander, and W. B. Hutchinson
- 115 Effect of aging on interfacial structures of nickel-based transition joints** R. D. Nicholson
- 129 Effect of small amounts of nitrogen and silicon on microstructure and properties of MAR-M002 nickel-base superalloy** G. L. R. Durber, S. Osgerby, and P. N. Quested
- 138 Automatic cleanliness rating of steels using image analyser and inclusion charts** T. Réti, Sz. Somogyi, and P. Tardy
- 145 Variations in mechanical properties and microstructure of CZ127 (Tungum or Ni-Al-Si α -brass) during aging after solution treatments at 800 and 900°C** C. D. Pitt and T. W. Pitt
- 149 Hot-deformation characteristics and extrusion of copper-nickel alloys** D. W. Livesey and C. M. Sellars
- 156 Prediction of roll force and torque during hot flat rolling of En 2 steel** A. J. Fletcher, V. G. Gibson, and J. A. Gonzales
- 169 31st Hatfield Memorial Lecture: Stainless steels – materials in competition** R. Kiessling
- 181 Strength and toughness of T42 high-speed steel** C. S. Wright, A. S. Wronski, and M. M. Rebeck
- 189 Transition from regular oscillations in flow stress to single peak during high-temperature torsional deformation of a low-alloy steel** E. Ruibal, J. J. Urcola, and M. Fuentes
- 196 Optimization of high-temperature compression of as-cast Al-Cu eutectic alloy** G. A. Nassef, A. El-Ashram, and M. Suery
- 201 Separation of components of Zn-Pb alloys by enhanced gravity segregation** C. F. Varotto, M. A. Audero, D. I. Vassallo, H. J. Ruffo, and R. Pascual

- 207 **Technical note: Relative stabilities of Mo_2C and V_4C_3 carbides in a low-alloy ferritic steel at $\sim 600^\circ\text{C}$**
R. B. Carruthers and M. J. Collins
- 208 **Technical note: Comparison of two methods of cold work to increase strength of hot-rolled reinforcing bar**
L. N. Pussegoda
- 217 **Hot ductility of Nb and Al microalloyed steels following high-temperature solution treatment** J. R. Wilcox
and R. W. K. Honeycombe
- 225 **Corrigendum**
- 226 **Structural characteristics and extrusion behaviour of Pb-Sn alloys in semisolid state** M. A. Taha and M. Suery
- 231 **Sliding-wear evaluation of nitrided austenitic alloys** R. D. T. Whittle and V. D. Scott
- 242 **Effects of overlap and deposition technique on weld-bead shape** D. J. Allen and C. Earl
- 249 **Conference report: 'Designing with high-temperature materials', University of Sheffield, 20-22 September 1983**
- 265 **Importance of k_p (Hall-Petch slope) in determining strength of steels** B. Mintz
- 273 **Reduction of temper embrittlement of 2-25Cr-1Mo steels by rare earth additions** R. F. Knight, W. R. Tyson, and
G. I. Sproule
- 280 **Cold roll and indent welding of some metals** R. C. Pendrous, A. N. Bramley, and G. Pollard
- 290 **Energy requirements for manufacture of some non-ferrous metals** G. F. Hancock
- 300 **Energy required to process ingots, semis, and finished products** N. Whitter and C. Hoskins
- 313 **Effect of high-temperature soak and cooling rate on recrystallization behaviour of two Al-Mg alloys
(AA 5252 and AA 5454)** M. A. Zaidi and T. Sheppard
- 320 **Stress-corrosion-crack growth behaviour of 7475 T6 retrogressed and reaged aluminium alloy** M. U. Islam
and W. Wallace
- 323 **Machining characteristics of microalloyed forging steels** A. R. Chambers and D. Whittaker
- 334 **Preparation of tin diffusion coatings on copper** R. D. Denman and C. J. Thwaites
- 341 **Energy conservation and energy management in the metals industry** J. Nelson, V. Tinnis, and C. Vartiainen
- 347 **Conservation of energy and materials by recycling complex alloys** G. Horn
- 350 **Heat flow, solidification, and energy aspects of DC and strip casting of aluminium alloys** T. W. Clyne
- 358 **CONFORM continuous extrusion process - its contribution to energy conservation** J. A. Pardoe
- 369 **Mechanical and magnetic properties of partially annealed low-carbon mild steel sheet** M. S. Devgun,
S. Garber, and J. F. Hill
- 378 **Sensitization of continuously cooled austenitic stainless steels** B. Baroux, M. C. Orlandi, and Ph. Maitrepiere
- 383 **Creep deformation and local strain distributions in dissimilar metal welds between AISI type 316 and
2-25Cr-1Mo steels made with 17Cr-8Ni-2Mo weld metal** I. J. Chilton, A. T. Price, and B. Wilshire
- 392 **Sliding-wear evaluation of Tufftrided austenitic alloys** R. D. T. Whittle and V. D. Scott
- 399 **Laser surface alloying of iron and 1C-1.4Cr steel with carbon** A. Walker, D. R. F. West, and W. M. Steen
- 405 **Using energy more productively by modifying existing processes: an overview of how the mineral and metal
industries can benefit** R. Horton

Proceedings of meeting 'Trace elements in superalloys'

- 413 **Editorial**
- 414 **Trace elements in superalloys - an overview** G. W. Meetham
- 419 **Sources of trace elements in primary raw materials used in production of superalloys** A. V. Bromley and
R. H. Parker
- 428 **Trace element control in vacuum induction and consumable-electrode melted Ni superalloys** G. L. R. Durber
and M. Boneham
- 438 **Importance of trace element control on mechanical and foundry properties of cast superalloys** D. A. Ford
- 446 **Effect of trace elements on forgeability of superalloys** F. Turner
- 453 **Effects of minor elements on weld cracking in superalloys (summary)** M. F. Gittos and M. H. Scott
- 454 **Effects of trace elements on mechanical properties of superalloys** M. McLean and A. Strang
- 465 **Effects of trace elements and environmental impurities on oxidation and hot-corrosion characteristics of
superalloys** S. R. J. Saunders
- 474 **Discussion, short contributions, and closing remarks**
-

- 481 Interpass recrystallization of austenite in some steels during rolling** F. Vodopivec, M. Gabrovšek, M. Kmetič, and A. Rodič
- 489 Creep-fatigue life prediction using simple high-temperature low-cycle fatigue testing machines** T. Endo and T. Sakon
- 497 Heat-transfer conditions in hot-top mould and cold-shut formation mechanism on DC continuously cast non-ferrous alloy rods** D. C. Weckman and P. Niessen
- 504 Development of grade API X80 pipeline steel plates produced by controlled rolling** M. Pontremoli, P. Bufalini, A. Aprile, and C. Jannone
- 515 Technical note: Application of instrumented Charpy test in evaluating toughness of heat-affected zones in linepipe welds** J. T. McGrath and M. J. Godden
- 521 Editorial**
- 522 Sliding-wear evaluation of boronized austenitic alloys** R. D. T. Whittle and V. D. Scott
- 530 Wear in a high-speed roller bearing** T. Savaskan and E. E. Laufer
- 535 Low-carbon Mn–Ni–Nb steel: Part 1 Development for pipeline applications using relaxed rolling conditions** F. Heisterkamp and K. Hulka
- 545 Low-carbon Mn–Ni–Nb steel: Part 2 Weldability** F. Heisterkamp and K. Hulka
- 550 Differential resistivity as a means of monitoring annealing in steels** R. A. L. Drew, W. B. Muir, and W. M. Williams

Book reviews

pages 211, 259, 308, 366, 555

Translations (BISITS lists)

pages 38, 77, 125, 167, 213, 261, 309, 367, 411, 478, 519, 556
